To whom it may concern:

It is with great pleasure that I recommend Dr. Rosa Chaves, MD as a candidate for a permanent teaching position at Valencia Community College.

She was my human biology instructor during the 2008 spring term. Considering the fact that science has never been my favorite subject, in only one semester, she single-handedly changed my view on the subject. Therefore, it is safe for me to say that she was one of the best teachers I have ever had in the area of science.

Her ability to connect with her students and her talent at teaching simple concepts, as well as more advanced topics, are both truly superior. She has excellent creativity in class, is extremely organized, reliable and very accessible. Due to her great knowledge and a very positive attitude, she was deeply appreciated, and respected by the entire group. I can assure you that if I had to take another science class, I would look for Dr. Chaves again.

I strongly recommend her and am sure that she will be a great asset to Valencia Community College. I truly believe that the students will be more than satisfied with her performance in the classroom.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Adriana P. Fracasso'.
