

Practice Quiz 10 Part A

Anti-depressants

DEH 2300 - July, 2014

- Prozac® (fluoxetine) is considered first line treatment for which disease/condition?
 - ADHD
 - Depression
 - Smoking cessation
 - Appetite suppression
- Which condition is likely to occur if a patient taking a drug classified as a monoamine oxidase inhibitor consumes foods or beverages such as red wine, aged cheese or organ meats?
 - Severe hyperglycemia
 - Hypertensive crisis
 - Cerebral edema
 - Ulcerative colitis
- Which medication is used as an anti-depressant and to assist with cessation of smoking?
 - Wellbutrin® (bupropion)
 - Loniten® (minoxidil)
 - Xanax® (alprazolam)
 - Ritalin® (methylphenidate)
- Which group of antidepressants is currently considered first line treatment for depression?
 - TCAs (tricyclics)
 - SSRIs (selective serotonin re-uptake inhibitors)
 - MAOIs (monoamine oxidase inhibitors)
 - Miscellaneous
- Tyramine rich foods are contraindicated with which group of antidepressants?
 - TCAs (tricyclics)
 - SSRIs (selective serotonin re-uptake inhibitors)
 - MAOIs (monoamine oxidase inhibitors)
 - Miscellaneous
- What is the likely outcome of the contraindication in question 5?
- Which group of antidepressants is considered “first generation” but not “first-line treatment”?
 - Tricyclics
 - MAOIs (monoamine oxidase inhibitors)
 - SSRIs (selective serotonin re-uptake inhibitors)
 - Miscellaneous
- Prozac® (fluoxetine) and Zoloft® (sertraline) are classified as:
 - Tricyclics
 - MAOIs (monoamine oxidase inhibitors)
 - SSRIs (selective serotonin re-uptake inhibitors)
 - Miscellaneous
- Which drug is primarily an antidepressant but has unlabeled uses of treatment for ADHD, neuropathic pain, fibromyalgia, stress incontinence, aggressive behavior and alcohol withdrawal?
 - Wellbutrin® (bupropion)
 - Prozac® (fluoxetine)
 - Zoloft® (sertraline)
 - Tofranil® (imipramine)
- Why is Catapres® (clonidine) contraindicated with tricyclics? What is the primary indication for Catapres®?
- List at least 3 contraindications for SSRIs?
- Write a **brief** drug profile for Viibryd® (vilazodone hydrochloride). The following website should be helpful.
